

WeatherHawk®
Wind/Weather Meters
Portable Measurement Instruments

WeatherHawk wind and weather meters are portable, hand-held instruments that allow you to measure your weather conditions wherever you are. Useful for a variety of outdoor activities, these products feature a jackknife case and two-year warranty. Choose from seven models of varying capability and price.

WM-100 WindMate® Basic Windmeter:

- Measures wind speed
- Provides current and maximum wind speed
- Reports 5-second average, 10-second average, and 13-second average

WM-200 WindMate® with Wind Direction:

- Measures wind speed, wind direction, and temperature
- Displays current temperature, and current, maximum, and average wind speed
- Reports wind direction in both degrees and compass points
- Calculates head wind, tail wind, cross wind, and wind chill

WM-300 WindMate® with Wind Direction and Relative Humidity:

- Measures wind speed, wind direction, temperature, and relative humidity
- Displays current temperature, and current, maximum, and average wind speed
- Reports wind direction in both degrees and compass points
- Calculates head wind, tail wind, cross wind, wind chill, wet bulb, dew point, delta T, and comfort index (Accuweather.com patented)

SM-18 Skymate Wind Meter with Temperature and Wind Chill:

- Measures wind speed and temperature
- Displays current temperature, and current, maximum, and average wind speed. Calculates wind chill

WM-100 includes a wind vane to ensure accurate measurements on the wind's axis.

\$120.00

WM-200 has a wind vane and a USA-made fluxgate compass for digital wind direction. It calculates cross wind, head wind, and tail wind.

\$225.00

The WM-300 is a comprehensive instrument for agriculture, forestry, emergency management, and other industries.

\$297.00

The SM-18 has a convenient pocket-knife design. Its accuracy and price make it a great value in a handheld unit.

\$164.00
